

Certificate of Analysis

Product:	Rabbit Monoclonal Antibody Anti-Human Ig Light Chain Rabbit Monoclonal Antibody, Clone RM129
Catalog No.:	32-1031-00
Lot No.:	
Clone	RM129
Specificity	This antibody reacts to both kappa and lambda light chain of human immunoglobulins. It does not react to monkey (Cyno or Rhesus) IgG, mouse IgG, rat IgG, or goat IgG.
Application:	ELISA, Immunohistochemistry, Immunocytochemistry, Flow Cytometry.
Immunogen:	Human IgG
Purity:	Protein A affinity purified from an animal origin-free culture supernatant
Size:	100 µg
Concentration:	1.0 mg/mL
Buffer:	50% Glycerol/PBS with 1% BSA and 0.09% sodium azide
Usage:	ELISA: 0.1µg/mL – 0.5µg/mL; IHC, ICC: 0.5µg/mL – 2µg/mL; FC: 0.5µg/mL-2µg/mL.
Storage:	Stable for 1 Year at -20.0°C from date of receipt.
Country of Origin:	U.S.A.
Intended Use:	For Research Use Only Not for Diagnostic or

ELISA shows that clone RM129 does not react to monkey IgG. The plate was coated with Rhesus monkey IgG. A serial dilution of RM129 and a monkey IgG reacting antibody (positive control) was used as the detection antibodies.

ELISA shows that clone RM129 reacts only to the kappa and lambda light chains in all human immunoglobulins, and does not react to mouse IgG, rat IgG, or goat IgG.

A titer ELISA using RM129. The plate was coated with different amounts of human IgG4κ. A serial dilution of RM129 was used as the primary antibody, followed by an alkaline phosphatase conjugated anti-rabbit IgG as the secondary antibody.

A titer ELISA using RM129. The plate was coated with different amounts of human IgG3λ. A serial dilution of RM129 was used as the primary antibody, followed by an alkaline phosphatase conjugated anti-rabbit IgG as the secondary antibody.
